

2013 kayaks . paddles . clothing . accessories

*Dear friends  
of the kayaking sport,*

last year I had the wonderful opportunity to test our sea kayaks as far away as Greenland. I did not only enjoy combining hobby and profession there, but I became again aware of how fascinating our sport is.

In what other way can you move so quietly and with your own muscle power and in what other way can you move your approximately 80kg of luggage so easily and with little input of energy.

But I am not only fascinated by travels to far off countries, an evening glide on our local Simssee at sunset or a fun-packed white water ride on the nearby Brandenberger Ache are all it takes to remind me of the amazing diversity of my sport.

The sport of kayaking is something for young and old, for ambitious paddlers who do sports to keep fit as well as for those who prefer a leisurely paddle to enjoy nature. Immerse yourself into the fascinating world of kayaking.

Kayaking is our passion, which we would like to share with you.

A handwritten signature in black ink that reads "Sven Pujin".

## Made in Germany

All HTP-kayaks and various accessories like the steering equipment, roof rack accessories or boat carts are "Made in Germany". Further items like paddles, spraydecks and packbags are from EU-partner countries. Short distances as well as close contact between us and the respective production guarantee a best-possible quality control. Transport routes of the goods are considerably shorter, thus the amount of energy required for transport is also reduced.

The maintenance and creation of jobs is a big issue for us. Suppliers in Germany and Europe are benefitting from this strategy. Products, produced in the region of Germany are marked with the German flag. Products, „made in Europe“ are marked with the EU flag.

## *Sea Kayak Tours with Prijon*

You would like to go on guided sea kayak tours in maritime surroundings? We are offering you the chance to spend a week of memorable day tours with our seasoned guide in a very scenic region of Croatia. Choose between Prvic (near Šibenik) and Risanka on the main island of Kornati. Please refer to [www.prijon.com/seekajakreisen](http://www.prijon.com/seekajakreisen) on our website for the dates.

For our base in Risanka, we can make you individual offers for individual dates, starting from a number of 5 participants, be it self-catered or with half or full board. Just be in touch!

Phone +49 8031 / 30370 or [seekajak@prijon.com](mailto:seekajak@prijon.com)

You would just like to hire equipment locally?

In Prvic Island it is possible to rent our sea kayaks with spraydeck and paddle, provided that you stay with our landlord Ante on the island. Just let us know, if you are interested.

*[www.prijon.com](http://www.prijon.com)*

## *Kayak School, Rental & Guided Tours*

Learn kayaking at one of our kayak schools.

## Which boat is the right one for me?

On the following pages you will find our touring and sea kayaks. In order to facilitate the direct comparison, we have attached our info centre at the back of the catalogue with the most important figures and characteristics of the boats.

We divided the term touring kayak into different categories to make your pre-selection progress easier.

The division was made mainly according to boat size.

*To put it simply:*

*Long + slim = wobbly + fast*

*Short + wide = stable + slow*

*Beginners*

*Allrounder*

*Fast single kayaks*

### *Allrounders for all occasions*

This category is ideal for a vast range of terrains, from rivers to coastal waters in calm conditions. Here you will find well-trying allrounders for luggage tours, for example the Touryak, agile kayaks for fast-moving rivers, like the Yukon Expedition and various two-seaters. These boats have been constructed a bit shorter and broader to provide a higher level of base stability.

*You find fast single kayaks  
from page 8 ...*

### *Fast single kayak for lakes, coast and the sea*

These boats are relatively slim and long, a fact, which provides them with a high base speed and pronounced tracking qualities. However, slim boats are less stable with regard to keeling over. For seasoned paddlers this is no problem. Beginners should test these boats on calm waters first.

*You will find the allrounders  
from page 16 ...*

### *Boats for beginners and occasional paddlers*

These kayaks are very similar to the allrounders with regard to boat shape. They have good tracking, but can be maneuvered well. The essential difference is the technical equipment of the boats. There are no waterproof storages (apart from the Cruiser II) and the seating is also simpler. Therefore these boats are very well suited for short tours without a lot of luggage or for kayak rental.

*You will find these  
kayaks from page 22 ...*

## Which material is the best?

We are offering three different materials for sea kayaks and touring kayaks. You will find the best kayak material for your purpose. HTP is the sturdiest material used in the production of kayaks world-wide. Whatever you are planning, the boat is up to it. Laminate kayaks, made of Carbon-Aramide are very light and elegant. If low weight is important to you, they are the right choice.

Laminate boats are, however, more susceptible to ground impact and should therefore be primarily used in free-flowing waters. PriLite kayaks are in between HTP and Laminate with regard to weight and sturdiness. They are lighter than HTP, but sturdier than Laminate kayaks.

### HTP

#### HIGH-PERFORMANCE THERMOPLAST

For the production of its world-famous HTP-kayaks, PRIJON is using a special PE, called HTP. This material can only be used in blow-moulding and not in roto-moulding, as used by other producers of kayaks. The molecule chains of HTP are approximately 10 times longer than those of rotated PE. This makes the boat hulls stiffer, lighter and less susceptible to abrasion. HTP-kayaks have clear advantages regarding form stability, abrasion and boat weight, compared to kayaks made of rotated PE. HTP is very environmentally friendly. When it is recycled, there are no poisonous gases or residues; it is ground water neutral and free of heavy metals. Care: HTP-boat shells are very sturdy and already possess a permanent protection against UV-rays. Therefore they need no treatment with varnishes, wax or other care materials.

- + Extremely high level of mechanical resilience
- + Not sensitive to ground contact
- + Stiff and form stable when paddling in arctic or tropical regions
- Comparably high weight

### PriLite

For PriLite boats, the ABS-combination plates, sealed with UV-resistant perspex, are pulled into the hot moulds, which have a temperature of approximately 80 degrees, in a computerized process, using heat and vacuum. The upper and lower parts of the boat are inseparably joined together by a double-sided U-profile. This profile additionally strengthens the sides of the kayak against impact. The mounting of deck mountings and interior fittings are thoroughly done by hand, as on all Prijon boats. Advantages: PriLite boats are approx. 20% lighter than comparable kayaks made of HTP. At the same time there is a clear advantage regarding stability compared to GFK or Carbon/Aramide.

Repairs/Care: Superficial scratches can be polished off with a special paste, available in specialized shops. Larger repairs are made with Epoxi. The inside of the boat should not be permanently exposed to sun (store upside down!).

- + Lighter than HTP
- + More sturdy than GFK/Carbon Aramide
- More susceptible to mechanical wear and tear than HTP

	mechanical resilience	thermal resilience	not sensitive to ground impact	weight handling
HTP	■■■■■	■■■	■■■■■	■■■
GFK	■■■	■■■■■	■■■	■■■■■
Carbon-Aramid	■■■	■■■■■	■■■	■■■■■
PriLite	■■■■■	■■■■■	■■■	■■■■■

## Laminated kayaks

Laminated kayaks are made by hand in the traditional way. They are more sensitive to contact with the ground compared to boats made of HTP or PriLite, and should therefore be predominantly used in free-flowing waters. PRIJON is offering the two material varieties of GFK and Carbon/Aramide.

### Carbon-Aramide

These boats mainly consist of carbon and Aramide fibres, combining the excellent qualities of carbon, which is very hard and gives the boat its stiffness with the qualities of Aramide, which is very shock-proof and provides the necessary impact resistance of the kayak. The biggest advantage of this construction method is clearly the incredibly low weight (up to 10kg lighter than HTP-boats).

- + The lightest boat, 25% less weight than a HTP-kayak
- + Elegant shape
- More susceptible to mechanical wear and tear than HTP and PriLite

### GFK

The fibre mats of our GFK-kayaks mainly consist of glass fibres, which are very stiff, but still reasonably priced. Kayaks made of GFK are comparable to the PriLite boats with regard to their weight.

- + 20% reduction of weight compared to a comparable HTP-kayak
- + Elegant shape
- + Simple handling outside the water
- More susceptible to mechanical wear and tear than HTP and PriLite

## FLEX 4 SYSTEM

Ample adjustment options to efficiently adjust the seating position.

**1** Thigh cushions are adjustable lengthwise by approx. 7 cms, thus permitting knee angle to be perfectly adjusted.

**2** By loosening the screws at the sides, the seating shell can be moved and continuously adjusted by approx. 10 cms. Don't forget to tighten the screws again!

**3** A rope clip, centrally located at the seat, arrests the angle of the backrest.

**4** The position of the foot rest with the control pedals can be adjusted according to leg length.

The new **TOURYAK 500** is the ideal kayak for your tours on rivers, lakes and along the coast. Thanks to the generous amount of space in the cockpit and luggage compartments as well as its comprehensive standard equipment, the TOURYAK 500 is perfectly suited for paddling tours with luggage.

#### TOURYAK 500

You will find detailed information on suitability and characteristics in our Info Centre on page 51 ...

Info regarding our test dealers at [www.prijon.com](http://www.prijon.com)

material	HTP
length	503 cm
width	63 cm
weight	28 kg
volume	455 l
paddler weight	160 kg
cockpit	4 (94 cm)

Art.No. 100 850

The modern lower boat with the dished sides offers a very high level of initial and secondary stability, whilst running easily. By using the edges of the hull, even a narrow curve radius can be mastered almost effortlessly. This is due to the combination of rocker, the edges on the lower boat and the best possible control due to the adjustable 3D thigh rests. Take the opportunity and test the TOURYAK 500 at one of the numerous testing events, provided by our dealers.

Made in Germany

#### STEERING EQUIPMENT

Art.No. 90 524

Almost all PRIJON touring kayaks can be equipped with a foot steering. The necessary steering attachment has already been installed in the boats. The initial installation of the steering should therefore only take a few minutes. The steering has a positive effect on tracking and agility.

Steering which unfolds fully, for PRIJON one-seaters with profiled, flow-optimized steering blade, made of fibre-reinforced plastics.

TOURYAK MOTION

material	HTP	HTP
length	470 cm	454 cm
width	63 cm	59 cm
weight	27 kg	26 kg
volume	440 l	340 l
paddler weight	150 kg	110 kg
cockpit	2 (92 cm)	3 (88 cm)

Art.No. 100 840

Its slim shape as well as a flatter cockpit make the MOTION especially interesting for a bit sportier and lighter paddlers. Despite the compact length, the MOTION is pleasantly fast, but remains tilt-resistant at any time. A great boat for extended touring.

🇩🇪 Made in Germany

Art.No. 100 530

Medium and larger paddlers wishing to go on longer tours with luggage, are very well suited with the TOURYAK. Very good tracking qualities, a safe position in the water and a spacious seating area constantly provide the feeling of being on top of the situation.

🇩🇪 Made in Germany

Adriatic Coast Croatia  
Gregor Zadavec

Compact measurements, a light weight as well as a good price-performance-ratio are the characteristics of the *DAYLINER SERIES*, which has acquired a large fan base by now. Kayaks of the DAYLINER series come with two watertight partitions and a comfortable seat. The simple deck equipment saves weight and permits us to offer you a favourable starter price.

cockpit	9 (100 cm)	2 (92 cm)	3 (88 cm)

NEW

## Dayliner „Light“

## Dayliner L

## Dayliner S

GFK: Art.No. 206 82  
CA: Art.No. 206 84

The new „Light“ was created following the many requests for a compact all-rounder, which is not prone to tip easily and even lighter. The measurements are similar to those of the Dayliner L. Only the cockpit has been extended to almost 100 cm, in order to especially facilitate getting in and out of the boat for less mobile paddlers. It is now possible to stand upright in front of the seat. Its light weight makes it simple to handle the DAYLINER „light“, especially when loading and transporting this kayak. This model comes in the materials GFK and Carbon /Aramide.

■ Made in Europe

Art.No. 10 190

The DAYLINER L is a compact, light HTP kayak for exciting paddling tours. The L version was designed for medium to large paddlers. Pronounced edges on the lower boat hull provide good tracking stability, agility is guaranteed due to the shortness of the boat. Ideal for beginners who are looking for uncomplicated paddling fun, but do not want to do without basic equipment features, such as watertight storage compartments for example.

■ Made in Germany

Art.No. 10 180

The DAYLINER S is a short, light, single tourer for tours on lakes and rivers. Smaller, lighter paddlers will feel at ease in this boat right away. Thanks to the flat, well-cushioned thigh rest, the ideal seating position is quickly adopted.

■ Made in Germany

*i* Preliminary picture. The finished boat can differ from the picture.

Aeolian Islands  
 Alexander Rochau

### STEERING KII

Steering which unfolds fully for PRIJON two-seaters with profiled, flow-optimized XL steering blade made of fibre-reinforced plastics.

There is the option for almost all PRIJON two-seaters to be equipped with a foot steering. The necessary steering attachment has already been installed in the boats. The initial installation of the steering should therefore only take a few minutes. The steering has a positive effect on tracking and agility.

#### Art.No. 100 80

The ideal two-seater for your river tour. Due to the broad knickspant and lots of rocker the boat glides easily around narrow radiuses. That's why the EXCURSION EVO is best-suited for tours on rivers and lakes. The comfortable seat provides a high level of comfort, even on longer tours. Since the EXCURSION EVO has a very large overall volume, we can offer a lot of storage space and a very high degree of safety. A very stiff boat hull is the result of our superior HTP material. This boat will accompany you through thick and thin.

Made in Germany

#### Art.No. 101 70

Reisezweier für offene Gewässer und Küstentouren. Beim POSEIDON sorgt ein ausgeprägter Kielansatz im Bug- und Heckbereich für hohe Spurtreue und eine angenehme Reisegeschwindigkeit. Somit ist er in erster Linie für Wanderfahrten auf offenen Gewässern und an der Küste geeignet, wo es vorrangig auf Spurtreue und leichten Lauf ankommt. Natürlich verfügt auch der POSEIDON über eine langstreckentaugliche, komfortable Sitzanlage.

GFK: Art.No. 201 92  
CA: Art.No. 201 94

GFK: Art.No. 205 92  
CA: Art.No. 205 94

The perfect kayak for long tours across open waters. Good running qualities and a comfortable seating position are the basic prerequisites for long tours in the kayak. The Yukon glides through the water easily and brings you safely to your destination. Large storage compartments offer space for your equipment. With a weight of 25 and 29 kg respectively it is among the lightest boats of its class.

Open variety of the K II Sport. Length, width and the lower boat are identical with the Sport, which provide the RELAX with the same good running qualities. The open large single hatch makes it a great touring boat for domestic waterways with relatively moderate swell.

■ Made in Europe

■ Made in Europe

 You will find detailed information on suitability and characteristics in our Info Centre on page 51 ...

GFK: Art.No. 209 92  
CA: Art.No. 209 94

Allround-touring kayak for smaller and lighter paddlers. Best suited for smaller adults who are looking for a boat which is easy to load and transport, but still runs like a big touring kayak. The Alborea weighs only 17 kg in GFK with a length of 422 cm and a width of 60cm. Loading on the car roof as well as transport to the water becomes very easy. A well-balanced hull with good edges and slight keel lines at the front and back provide the ALBOREA with best allrounder qualities regarding touring on rivers and lakes.

■ Made in Europe

GFK: Art.No. 205 02  
CA: Art.No. 205 04

Good tracking on open waters, agile on smaller rivers! Based on the YUKON shape, the LAGUNA is predominantly suitable for smaller and medium rivers and lakes. The keel is not as pronounced as on the longer touring kayaks, which gives the Laguna greater agility. Even a slight use of the edges noticeably reduces the curve radius. So it is a lot of fun moving the LAGUNA around narrow curves. The weight for the Carbon boat is approx. 18.5 kg. The handling of this lightweight is very simple, loading on and off the car roof is no longer a problem.

■ Made in Europe

Art.No. 209 90

Immediate paddling fun for your kids with the FLIPPER. Thanks to PriLite the Flipper has an unrivalled low weight, which enables children to playfully move the boat. With its child-friendly seating position, the small paddlers feel safe in the boat at all times. Due to the pronounced v-spant your children can acquire a good "boating instinct".

The Flipper's size-adjusted length ensures that the small paddlers can soon keep course and paddle alongside their parents.

■ Made in Germany

## We offer the Seayak Junior in 2 Sizes

The new SEAYAK Junior has been perfectly adapted to suit the needs of children and teenagers. The Junior is equipped with the traditional PRIJON knickspant, so it runs nice and straight and maneuvers well. It is these riding qualities that enable the Junior to keep up well with longer and bigger boats, even over longer stretches. In order to provide a lot of mobility, the seating hatch is kept very flat at the back. A flat, well-cushioned thigh rest provides support and safe contact with the boat.

Exhausted, but happy.  
Archive Prijon

*Kayak-Smurf*  
Exclusively at Prijon!  
Art.No. 99 995

You will find detailed information on suitability and characteristics in our Info Centre on page 51 ...

## STEERING JUNIOR

For the Junior PRO we are offering an optional steering, which children can use on longer tours to compensate external influences, like wind from the side. The steering blade has been adjusted to match the size of the boat, in order to keep resistance as low as possible.

Art.No. 90 523

## Art.No. 100 740

Buoyancy foam at the front, but without separation, steering mountings and perimeter lines. Optional floater available.

🇩🇪 Made in Germany

## Art.No. 100 745

Buoyancy foam at the front, separation at the back with watertight lid, attachment for steering and perimeter lines at the front and back. In this version the boat is unsinkable without additional floaters.

ACCESSORIES

We recommend the spraydeck TOURING Spezial for our sea kayaks.

Art.No. 73 700

Almost all PRIJON tourers have the option of being equipped with a foot steering. The necessary steering attachment has already been installed in the boats. Steering which unfolds fully for PRIJON one-seaters with profiled, flow-optimized steering blade made of fibre-reinforced plastics.

Art.No. 90 524

## Seayak 520 HV

Art.No. 100 450

Sporty and safe SeaTourer for medium to higher weight. Long luggage tours across open waters are its domain. The dished sides of the lower boat provide it with a reliable secondary stability. Flat on the water the 520 HV possesses a high tracking quality, but is easy to maneuver along bends via its lateral edges.

🇩🇪 *Made in Germany*

## Seayak 500 LV

Art.No. 100 440

Sporty and fast kayak for smaller and lighter paddlers. Main features are the slim and sporty form, small overall volume as well as a seating hatch with an ideal seating position for smaller paddlers. Due to the flat upper boat at the rear, the 500LV is not very susceptible to lateral wind and offers a lot of back space when rolling up. Characteristic lines on the lower boat, derived from our knickspant, provide the 500Lv with a high tracking quality as well as good agility across the lateral edge.

🇩🇪 *Made in Germany*

## Seayak Classic

Art.No. 100 430

For many years now our well-trying allrounder in the segment of fast single kayaks. The SEAYAK Classic, a bit shorter and more agile than its brothers, is excellently suited as allround touring kayak for rivers and open waters. The classic knickspant provides high stability and manageability. For paddlers of medium weight and height, the boat offers comfortable space, even on longer tours.

🇩🇪 *Made in Germany*

Art.No. 20 140

Elegant, stretched lines make it an ideal boat for travelling. Despite its light weight, the MARLIN is comparably sturdy. Flat angles on the lateral areas make the boat very manageable when using the edges. Changes in direction are supported in the best possible way. The boat is always stable in the water. Sporty tourers who surf with the wave and want to keep control, will be enthusiastic. Safe forward gliding, fast changes in direction using the edges, everything can be done in a safe and precise manner. The very comfortable seat is absolutely suited for longer tours.

🇩🇪 Made in Germany

Art.No. 10 140

The KODIAK is fast, safe and a great load carrier. The KODIAK is fast, safe and offers unique storage space for this boating class as well as a very spacious cockpit which makes it especially interesting for larger paddlers. The high volume is also a further safety aspect when touring at sea. In the past few years the KODIAK has established itself as expedition boat around the globe. Several Greenland expeditions, the circumnavigation of the North American Continent as well as the whole coast of Norway are only a small selection of tours, during which the KODIAK has confirmed its outstanding position as a safe and fast sea kayak.

## *Barracuda RS*

GFK: Art.No. 20 802  
CA: Art.No. 20 804

Ideal for fast touring or the daily exercise round on a lake. The BARRACUDA RS is a very fast kayak for sporty and ambitious paddlers. Your evening training rounds will be twice as much fun at this speed! Due to its base speed, it is possible to cover even long stretches in amazingly short time. Take your time to get used to the BARRACUDA and you will have lots of fun.

■ *Made in Europe*

## *Millenium*

GFK: Art.No. 20 692  
CA: Art.No. 20 694

The MILLENIUM is the elegant and lighter version of our Seayak. This beautiful kayak is a combination of a fast sea kayak and an agile single kayak for rivers and lakes. On the one hand the long, slim, form provides a high level of speed, the pronounced lines on the lower hull, on the other, offers a comparably high measure of agility, so that you will be able to use the MILLENIUM also on rivers and lakes in an optimum way. An attractive look and the complete equipment round off the picture of this excellent kayak.

■ *Made in Europe*

## *Proteus*

GFK: Art.No. 20 292  
CA: Art.No. 20 294

Currently the PROTEUS is probably the fastest PRIJON Kayak. It is designed for long, fast tours in open waters and along the coast. Especially prominent keel areas at the front and back provide for an optimal water line. The safe position in the water and a balanced ratio between tracking and the ability to maneuver makes you feel confident in all areas.

■ *Made in Europe*

*The following pages feature our boats for beginners and occasional paddlers*

The models Capri and Cruiser are not very prone to tilting and are budget-friendly alternatives for beginners and occasional paddlers. These boats can be used on shallow rivers and lakes without any worries. However, there are certain things to observe when choosing the right boat. Capri and Cruiser are only suitable for the sea in calm weather with light waves and near the coast. In case of stronger waves one needs the best possible contact with the boat, provided by thigh rests. In case of the CRUISER series, this thigh contact is only provided to a certain extent.

Of course these boats compensate a lot with their high level of stability with regard to tilting, but one should still get thorough information to find out which boat is the right one. Sometimes it makes sense to look at boats of a bit higher category, like the DAYLINER series on page 10 and 11, for example.

On tour with Prijon beginner kayaks

paddler weight	90 kg	200 kg	200 kg
cockpit	2 (92 cm)	1 (81 cm) + 2(92 cm)	3 (88 cm)

## Capri I

Art.No. 10 930

The Capri I possesses very good tracking qualities, considering its compact measurements. With a form which is overall a bit slimmer, it is a sporty alternative to the CRUISER boats, especially for smaller and lighter paddlers.

🇩🇪 *Made in Germany*

## Capri II

Art.No. 100 960

The Capri II is an easy to handle, compact two-seater for beginners and occasional paddlers. Its pleasant and uncomplicated tracking qualities as well as its light weight are above all interesting for smaller and lighter paddlers.

🇩🇪 *Made in Germany*

## Piave

GFK: Art.No. 20 892

CA: Art.No. 20 894

The PIAVE strongly resembles the Capri II in form and riding qualities. We are offering this kayak in GFK or Carbon-Aramide. The PIAVE GFK is approximately 25% lighter, the PIAVE CARBON approx. 30% lighter than the Capri II made of HTP. This makes the PIAVE the first choice for paddlers who are looking for a lighter and easy to handle boat, which can still be stored well on a higher car roof.

🇪🇺 *Made in Europe*

## The Cruiser Family

Great for beginners, occasional paddlers and canoe tourism. All boats are easy to maneuver and have good tracking. The very big cockpit facilitates getting in and out of boat and conveys a very open feeling when seated.

*Explore the world!*

 On tour with the cruiser.  
 Archiv Prijon

You will find detailed information on suitability and characteristics in our Info Centre on page 51 ...

The storage at the very back of the cruiser models 320, 430 and II is not watertight. We recommend the use of watertight pack bags. Almost unsinkable due to the hard foam core at the front, large, sealed storage space in the stern.

Steering mountings standard feature for all CRUISER-models.

	CRUISER 320	CRUISER 430	CRUISER II
material	HTP	HTP	HTP
length	323 cm	430 cm	470 cm

cockpit	7 (110 cm)	7 (110 cm)	7 (110 cm)

### *Cruiser 320*

*Art.No. 100 130*

A lot of fun at a short length. Ideal for short trips on small rivers and lakes. The compact measurements make transport and storage easier.

🇩🇪 *Made in Germany*

### *Cruiser 430*

*Art.No. 100 230*

A well-priced allrounder for all occasions. Very manageable and due to enough speed also making a good impression on longer stretches.

🇩🇪 *Made in Germany*

### *Cruiser II*

*Art.No. 100 229*

Two kayakers on the water in a safe and spacious boat. Glide across the water without any problems with the CRUISER II. You will enjoy it!

🇩🇪 *Made in Germany*

Team Prijon in action.

***PRIJON IS REDUCING PRICES IN GERMANY!*** From the 1st of January 2013 we are offering whitewater kayaks at reduced prices. You also can buy the models FORTE and PURE together with selected accessories directly from PRIJON. At our new online shop from January at [www.prijon.com](http://www.prijon.com). Delivery only to Germany.

### AIR BAGS FOR WHITEWATER KAYAKS

Prevent a kayak from filling with water after emergency exits and provide extra stiffness for the boat.

We are offering single floaters as in table on right.

### SIZE

TYPE	FRONT	BACK
Pure	2	5
Forte	2	4
Hercules	2	5
Wizard	1	4
Cross	2	5
Soca	2	4
Chopper	2	5
Creeker 225	2	5
Fly	1	4
Tornado / Taifun	3	6
Canoes	Buoyancy tubes 3,2m (pair, blue)	

The **FLEX 6 seating system** with its 6 different options of adjusting the seat offers extremely secure hold in the boat and enables you to adjust your seating position in the best possible way. Whether you prefer to sit loosely or very tight, the FLEX 6 can be adjusted by hand to the best-possible seating position with a few simple movements.

#### SHOCK ABSORBER DEFLECTOR PLATE

The foam-cushioned deflector plate can be adjusted to leg length and guarantees best-possible safety. The safety belt at the side of the shock absorber deflector plate cushions blows on impact and enables you to adjust the shock absorber lengthwise while sitting in the boat. Club-boats and the Chopper are equipped with a basic deflector plate.

#### 3D THIGH RESTS

The 3D thigh rests are adjustable with regard to length, turning and depth, optimizing the seating position and hold in the boat even further. Club-boats and the Chopper are equipped with basic thigh rests.

#### ADJUSTABLE SEATING SHELL

The seat can be continuously adjusted lengthwise. The trimming and the distance to the thigh rests can be adjusted in accordance to the individual paddler's requirements. Loosen the screws at the sides, move the seat and then tighten the screws again.

#### FOAM-CUSHIONED SEATING SHELL WITH CENTRE WEDGE

The foam wedge in the seat middle determines the seating position in the seating shell and prevents unintended slipping forward. It can be adjusted lengthwise.

#### HIP CUSHIONS

The hip cushions of the foam seat are adjustable by distance wedges. The seat becomes wider or more narrow.

#### BACK STRAP

A ratchet strapping system enables you to position your back rest in the best possible way. By putting pressure on the back rest, the paddler achieves the best possible seating position in the kayak and is supported between back rest and shock absorber plate.

🇩🇪 *Made in Germany*

*Art.No. 104 111*

The FORTE is a sporty river runner for light and medium-build paddlers, who have high standards regarding to their boat's riding performance. Its preferred terrain is the region up to WW4, it is, however, able to do more, if the paddler is up to it! A lot of rocker, a high rear as well as a volume centre of gravity which has been moved forward, together with pronounced edges on the lower boat, all these are the main characteristics of the FORTE. It is extremely agile and easy to surf, as it can be maneuvered well just by shifting one's weight. Of course, it is made of our almost indestructible HTP.

material	HTP
length	248 cm
width	63 cm
weight	ca. 20 kg
volume	ca. 220 l
paddler weight	60 - 85 kg
cockpit	L, 86 x 51 cm

Strubbach, Tyrol  
Archiv Team Prijon

Creekers of the *PURE* range impress due to their balanced riding qualities, high safety reserves as well as high quality craftsmanship. Fast changes of direction, safe and controlled resurfacing qualities combined with fast acceleration allow the paddler to concentrate fully on the creek.

*Alpin*

High quality white water spraydeck. Most of the plate is covered with an abrasion-resistant coat for long durability. Due to the Latex coat on the inside, this deck holds reliably on our standard cockpits. Grip sling at the front and knee belt are standard features. A first-class deck at a favourable price.

Width: 72 cm, 79 cm, 86 cm, 93 cm.

*Art.No. 73 600*

*Rock*

Allround whitewater spraydeck with knee belt and grip sling. Latex lamination for good grip on the cockpit rim. Outside lamination at the front to protect the Neoprene.

Waist size 81 - 85cm  
*Art.No. 72 500*

## Pure S

## Pure M

## Pure XL

Art.No. 101 721

Art.No. 101 711

Art.No. 101 731

The blow-moulded HTP boat hull is almost indestructible, also over several seasons the PURE is a safe boat for the toughest of conditions. The PURE S is very agile and sporty, for smaller and lighter paddlers up to a weight of approximately 75 kg. Paddlers of medium height and a weight of approximately 60-85 kg will find best suited riding qualities in the PURE M. For paddlers in the upper weight range and those who like to transport a lot of gear, the PURE XL is rounding off our range at the top end. To be able to profit from the advantages of the PURE XL, your weight should be at least 85 kg. Only then the boat will show its full potential. To accommodate larger paddlers, the cockpit of the XL is longer and a bit wider at the front.

Unsere PURE und FORTE sind auch im PRIJON Online Shop erhältlich unter [www.prijon.com](http://www.prijon.com)

Available lengths for our white water paddles:  
190cm; 195cm; 197.5cm; 200cm; 202.5cm. We also make paddles at special  
lengths, to suit your requirements. Standard rotation 45°.

### Godzilla

Attractive whitewater paddle, especially strong, with foam core and peripheral DYNEL edge. The paddle blade is very stiff due to our novel foam core technology, resulting in high pressure on the paddle. The felt forward propulsion is 20% higher. The built-in DYNEL edge is very impact-resistant and plays along with the bending movements of the blade. The higher volume of the paddle blade provides above-average floatation, similar to a wooden paddle.

The GODZILLA is available with a straight glass shaft or with an ERGO shaft, made of carbon.

Weight with straight shaft: 1020g  
Weight with ERGO shaft: 980g

Carbon Art.No. 335 000

Carbon ERGO Art.No. 335 000E

### RIM Kinetic

Sturdy, well-priced beginner paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

Length option WW, ca. 1150g  
Art.No. 316 000

### Ergo-shaft

Some of our white water and touring paddles are also available with a wrist-friendly ergo-shaft.

### White water helmet VACO

The new VACO helmet convinces due to a good fit and light weight. The cushions are filled with small plastic beads and thus adjust perfectly to the shape of the head. The light weight provides a comfortable fit, even over longer periods of time. The helmet is available in two sizes and colours.

Available sizes: M/L and XL  
Colours: light green and orange  
Weight: M/L 580g; XL 610g

Sizes: S/M and L/XL  
Art.No. 50 150

### Mach II

Fully equipped kayaking vest. Front zip for easy putting on and off. Enclosing strap system to fit the body shape in the best possible way. Hip belt, rescue belt with panic release, two pockets, reflective zones.

**NEW from 2013: Cowtail with paddle carabiner as a standard feature.**

Sizes: M/L and XL/XXL  
Art.No. 80 080

## Surf

Our classic helmet. A very popular helmet with a good price-performance-ratio. ABS-plastic shell with high level of rigidity. Shock-absorbent Polypropylene hardfoam interior with soft contact pads, which distributes the shock energy from outside and thereby reduces it. With the Spin-Disk-System, these helmets are continuously adjustable from 51 -63 cm head girth.

Available in the colours  
yellow, red and black.

*FULLCUT: Art.No. 50 110*  
*SHORTCUT: Art.No. 50 160*

## NOSE CLIP

With stainless steel spring clip,  
rubber pads and cord.

*Art.No. 90 185*

## PADDLE CARABINER

Carabiner for rescuing and securing of  
paddlers, boats and equipment. The large  
opening fits round the paddle shaft.

*Art.No. 80 410*

## KAYAK CARABINER

Universal carabiner for  
rescuing and securing.

*Art.No. 80 405*

## RESCUE KNIFE ARA XL

The ARA-XL by Antonini. The blade is made of best  
440-A-steel and has a rounded tip to prevent injuries.  
Devices for cutting ropes and belts, a large loop for  
the safety carabiner as well as a catch for the blade  
to prevent unwanted opening.

*Art.No. 80 511*

## KAYAKING KNIFE

Single hand knife with rust-proof 7cm  
blade. Rounded tip to prevent injuries.  
Grip aluminum with rubber effect, with  
loop for safety line and rust-proof clip for  
attachment.

*Art.No. 80 510*

## ROPE ROLL PULLEY

For building a hoist.

*Art.No. 80 180*

## Throwbag Team

Form stable kernmantle rope with a rupture  
load of approx. 1200kg. Extra large  
opening for quick filling. The Tenax – fastener  
can be handled well, even with cold  
fingers. Rescue carabiner on the throw  
bag line as a standard feature. Due to its  
flattened basic shape, the TEAM throwbag  
with its optiona hip belt can be attached  
flat to the body and does not interfere  
with paddling.

## THROWBAG TEAM

*Art.No. 80 322*

*Hip belt with fast release*

*Art.No. 80 310*

## Throwbag Allround

With a 20 meter line, belt loops at the sides and perimeter  
strap with a lock for fast attaching to the equipment when  
climbing or to secure it in the kayak.

*Art.No. 80 325*

## Coast & Baja

High-quality, hand-laminated touring paddles with smooth inside and pronounced grooves. These paddles provide strong propulsion, without drifting upwards or downwards. Strokes can be performed absolutely flutter-free. The DYNEL edge is characterized by its very high fibre density, absorbing blows very well when hitting the ground. Due to related materials in blade and edge, the connection is permanent and does not disintegrate easily, even when under a lot of bending strain, which can sometimes happen with aluminium edges. Due to our novel hardfoam technology the paddle blades are very stiff.

### Coast

The paddle blades of the COAST have a very slim design, making this model very well suited for strong winds on open waters. There is not so much contact area for the wind. The energy required per paddle stroke is relatively minimal, less propulsion can be compensated by higher frequency.

	BLADE SIZE	MATERIAL	WEIGHT	ARTICLE
COAST Carbon	54 x 16cm	Carbon	790g	329 000
COAST Carbon Smart	54 x 16cm	Carbon	870g	329 000 TS
COAST Carbon Ergo	54 x 16cm	Carbon	790g	329 000 E
COAST Blitz	54 x 16cm	Glas	1000g	327 000
COAST Blitz Smart	54 x 16cm	Glas	1080g	327 000 TS

*i* Our COAST paddle is, of course, also available with our neutral ergo-shaft or the intelligent smart-shaft take-apart system.

### Baja

The large and rounded blades of the BAJA paddle are very well suited for touring. Due to the large blade size, the paddler can bring a lot of energy on the water. Very recommendable also for two-seaters and one-seaters with more weight. At a higher frequency, sporty paddlers can achieve best possible propulsion.

DYNEL - Edge

	BLADE SIZE	MATERIAL	WEIGHT	ARTICLE
BAJA Carbon	49 x 18.5cm	Carbon	870g	320 000
BAJA Carbon Smart	49 x 18.5cm	Carbon	950g	320 000 TS
BAJA Carbon Ergo	49 x 18.5cm	Carbon	870g	320 000 E
BAJA Blitz	49 x 18.5cm	Glas	1120g	319 000
BAJA Blitz Smart	49 x 18.5cm	Glas	1200g	319 000 TS

*i* Our BAJA paddle is, of course, also available with our neutral ergo-shaft or the intelligent smart-shaft take-apart system.

For the models MISTRAL and STREAM, high-quality carbon or glass fibres are pressed under high pressure and at a high temperature. The profile in the paddle blade permits a construction without middle core. The blade is very stiff and does not flutter. Its stability can be compared to our high-quality white water blades.

Mistral - Glass

Mistral - Carbon  
Reverse side

Stream - Glass

Stream - Glass  
Reverse side

## Mistral

A modern touring paddle with wave profile in the paddle blade. Due to its blade size, the MISTRAL is very well suited for touring.

Blade size 53 x 18 cm

Mistral Carbon, approx. 910g, Art. No. 339 000L

Mistral Carbon with smart shaft, approx. 990g, Art. No. 339 000LTS

Mistral Carbon with ergo-shaft, approx. 920g, Art. No. 339 000LE

Mistral Glass, approx. 1040g, Art. No. 338 000L

Mistral Glass with smart shaft, approx. 1120g, Art. No. 338 000LTSa

## Stream

High-quality touring and sea kayak paddle. Due to a bit flatter shape, the STREAM is also suited for sea kayaking. It glides easily through the water, saves energy and does not flutter.

Blade size 49 x 17.5 cm

Stream Carbon, approx. 880g, Art. No. 318 000

Stream Carbon with smart shaft, approx. 960g, Art. No. 318 000TS

Stream Carbon with ergo-shaft, approx. 880g, Art. No. 318 000E

Stream Glass, approx. 1020g, Art. No. 317 000

Stream Glass with smart shaft, approx. 1100g, Art. No. 317 000TS

Also available  
in green.

## Bora

The „BORA“ paddle with its beautiful shape is a cheaper variety of the new profile touring paddles. We are using a dry impact resistance polyamide 6 with UV stabilizers, enriched with approx. 35% glass fibre. In doing so, we achieve a high level of stiffness, while at the same time keeping the impact resistance very high.

approx. 970g

Art.No. 355 000

incl. Smart-Schaft: 355 000TS

## Passat

With a blade area reduced by approximately 25% and a smaller shaft diameter, compared to the BORA paddle, this paddle is especially suited for teenagers and small adults. The low weight and the small effort needed, make it possible to paddle also longer stretches without tiring quickly. **Our Passat paddles are unfortunately not available with smart shaft.**

approx. 870g

Art.No. 356 000

### Length options (in cm)

215, 220, 225, 230, 240

All paddles are also available in left-hand-control.

## Smart shaft

Almost all touring paddles are available with Smart Shaft for an extra charge. For continuous adjustment of paddle rotation and length. Lengths: 210cm, 220cm und 230cm, each paddle can each be continuously adjusted by additional 10cm.

## Ardeche

The paddles of the ARDECHE series have been especially designed for classic touring purposes. The asymmetrical blade shape ensures energy-efficient and effective strokes. The centre rib stabilizes the blade, making strokes smooth and flutter-free.

Carbon - Ardeche  
Reverse side

Paddle Ardeche - lenght option A

### Carbon Ardeche

Extremely light touring paddle made of carbon-aramide material. Blade with Dynel edge. Hand-laminated.

*APPROX. 930g, Art.No. 324 000*

*With Smart-Shaft: 324 000TS*

*With Ergo-Shaft: Art.No. 324 000E*

### Blitz Ardeche

Elegant and light touring paddle. Blade laminated by hand from glass - Epoxi with reinforced edge. Glass shaft with grip profile.

*approx. 1160g*

*Art.No. 364 000*

*With Smart-Shaft: 364 000TS*

### RIM Ardeche

Well-priced beginner paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

*Aluminiumshaft, approx. 1100g*

*Art.No. 314 000*

### RIM Bambino

Paddle for children and teenagers. Reduced blade size with a thinner shaft for a better hold for small hands.

*Lenght option C, approx. 1080g*

*Art.No. 313 000*

### RIM Kombination

An all-round paddle, which can be used both for white water and touring. Blade made of impact-resistant RIM material, shaft made of anodised aluminium.

*Lenght option WW,A, approx. 1130g*

*Art.No. 311 000*

### Drip rings

Split ring construction, fits any paddle. Set.

*Art.No. 90 182*

### Sunshine

Well-priced paddle for free time paddlers and children. Plastic blade made of ABS with vertical ribs. Aluminum shaft.

*Lenght option A,C, approx. 1150g*

*Art.No. 331 000, €46,90*

Length option in cm

WW	190	195	197,5	200	202,5
A	215	220	225	230	240
C	180	185	190	195	200

### *Chiemsee SUP RIM*

Stable and low maintenance due to the well-proven RIM technology. Pleasant handling thanks to great buoyancy qualities. A paddle for SUP beginners, as well as for rental and schools, excellent price-performance ratio! Length 220 cm, uncut, detachable grip. Weight approx. 990 g.

*Weight approx. 990 g.*  
*Art.No. 351 000*

### *RIM Indian*

Tough canoeing and rafting paddle. Blade made of impact-resistant RIM material. Aluminum shaft.

*Weight approx. 890g*  
*Art.No. 352 000*

The RIM Indian is available in lengths 140cm to 160cm, in steps of 5cm.  
Uncut length: 165cm

## *RIM Vesuvio*

Well-priced training paddle for dragon boat teams. Lengths 115, 120, 125 and 130 cm.

*Weight approx. 730g*  
*Art.No. 357 000*

### *Alz*

Take-apart wooden paddle with veneered blade and aluminum edge.

*Weight approx. 1250g*  
*Lengths: 210cm, 230cm, 240cm*  
*Art.No. 341 000*

## Our Spraydeck Range for Tourers and Sea Kayaks

We are offering spraydecks and hatch lids in three different materials.

### NEOPRENE:

These spraydecks are suited for permanent use on rivers, lakes and the sea. The most important characteristic of these decks is that they stay firmly on the cockpit, even in choppy waters and when doing an Eskimo-roll.

### FLEX:

The advantage of the stretchable FLEX-Nylon material certainly is its light weight and pack size. Still these spraydecks have very good hold on the boat, but their mechanic durability cannot be compared to Neoprene.

### NYLON black / yellow or red:

These are simpler spraydecks for touring on domestic waterways, to protect against spray and rain. These decks are a bit more favourably priced, but do not have as firm a grip on the boat as the FLEX- and Neoprene models.

### Flex

Light, high-quality spraydecks made of stretchy Nylon material with waterproof lamination. The big advantage of these decks is their perfect fit due to their neoprene-like stretchability, as well as their very light weight and small pack size.

S/M suitable for hatches sized 81 – 86 cm.  
L/XL suitable for hatches sized 88 – 94 cm.  
XXL suitable for hatches sizes 95 – 102 cm.

Cockpit S/M: Art.No. 74 500

Cockpit L/XL: Art.No. 74 550

Cockpit XXL: Art.No. 74 600

### Touring Basic

This spraydeck is suitable for tourers and also for easy white water or kayak rentals. Due to its extremely stretchable plate, the deck fits cockpits from 86 – 95 cm. Chimney made of breathable 3-layer laminate for best possible comfort. The very stretchable neoprene rim at the top provides safe hold on the body.

Cockpit S/M: Art.No. 73 801

Cockpit L/XL: Art.No. 73 802

### Touring Spezial

High quality touring and sea kayak spray-deck. Very stretchable plate with abrasion-resistant area at the front, knee belt and grip sling. Latex coat on the inside, excellent hold, even on wet cockpit rims. Chimney made of breathable 3-layer laminate for the most comfortable fit. Width of hem can be individually adjusted. Shoulder straps can be taken off.

Cockpit 81-87cm: Art.No. 73 750

Cockpit 88-95cm: Art.No. 73 700

### *Expedition Touring*

Touring spraydeck with waterproof zip by TiZip. The deck can be opened easily to reach items in the boat or simply for good ventilation. Plate made of Nylon reinforced with Cortex on the lateral rim of the cockpit. Net bag on the plate and on the chimney. Chimney made of breathable 2-layer material.

Size M: Art.No. 72 650, 86 - 90 cm

Size L: Art.No. 72 660, 92 - 94 cm

Size 7 Cruiser: Art.No. 72 670

### *Nylon rot*

Soft, light Nylon material, pocket at the front of the chimney, welded seams, removable shoulder straps.

Size and Art.No. see table

### *Nylon black - yellow*

Soft, light Nylon material, pocket at the front of the chimney, welded seams, removable shoulder straps.

Size and Art.No. see table

### *Nylon mit bag*

For all CRUISER models. The useful dry pack sack has been integrated into the spraydeck and firmly attached to it. Small items are within easy reach of the paddler.

Art.No. 74 195

### *Nylon universal*

Nylon spraydeck with mesh pocket at the front, grip sling and shoulder straps. Cockpit size and hem adjustable with elastic band.

Hatch to 85 cm: Art.No. 72 600

Hatch to 93 cm: Art.No. 72 700

### *Flex Hatch cover*

Stretches similar to neoprene, but can be stored easily.

Hatch 81-86cm: Art.No. 78 230

Hatch 88-94cm: Art.No. 78 235

Hatch 95-102cm: Art.No. 78 240

### *Hatch cover Neoprene*

Tight grip, won't flap.

Hatch to 85 cm: Art.No. 78 210

Hatch to 93 cm: Art.No. 78 200

### *Hatch cover Nylon*

Available in different hatch sizes. PVC-laminated material.

Size and Art.No. see table

### *Mach II*

Fully equipped kayaking vest. Front zip for easy putting on and off. Enclosing strap system to fit the body shape in the best possible way. Hip belt, rescue belt with panic release, two pockets, reflective zones.

**NEW from 2013: Cowtail with paddle carabiner as a standard feature.**

*Sizes: M/L and XL/XXL  
Art.No. 80 080*

### *Floater Life Vest*

Light touring vest with zip. Ideal for tourers or kayak rental. Equipped with reflectors for better visibility as well as a crotch-strap to prevent the jacket from riding up.

*Sizes: S, M/L XL/XXL  
Art.No. 80 070*

### *Angler Life Vest*

Inconspicuous simple life vest for fishing or paddling. Made of sturdy Nylon material with foam cushions which can be taken out. 3 large pockets. Zip at the front. 4 straps at the sides to adjust size. Shoulder strap for length adjustment.

*Sizes: M/L - XL/XXL  
Art.No. 80 030*

### *Kid Bouyancy Aid*

Front zipper, chest and tummy belt for perfect fit, crotch strap to prevent slipping out, unconsciousness-safe collar, signal whistle, large reflectors.

*Size 1: 15-20 kg  
Size 2: 20-30 kg  
Size 3: 25-40 kg*

*Art.No. 80 040*

### *Paddlefloat*

The paddle becomes a stabilizing boom, which facilitates re-entering the kayak. An essential companion when venturing into open waters. Our float can additionally be used as a flat packsack which can be stored under the deck net. For safety reasons you should carry a bilge pump in addition to the float.

*Art.No. 80 330*

### *Hand bilge pump*

Bilge pump to remove water from the kayak after capsizing or in case of leakage. Together with the paddle float essential, when paddling in the sea.

*Art.No. 90 123*

### *Paddle leash*

When the paddle gets lost, open waters can become very dangerous. Our sturdy paddle leash consisting of a 25 mm tubular strap with integrated rubber cord keeps your paddle safe to the boat. It is attached to the paddle with a belt loop with Velcro closure.

*Art.No. 90 180*

### *Towline Multi*

Sensible piece of rescue equipment for tourers and sea kayakers. Packed tightly, the towline is only a bit higher than the 5cm hip belt so that it fits well on the back between the lifevest and the spraydeck and does not hinder you from paddling. Packed loosely (bag folded out) additional pieces of equipment can be stored together with the rope. Equipment: rope length 10 metres with integrated impact-softener. Kayaking carabiner with floater. Hipbelt with quick fastener, reflective zone.

*Art.No. 80 178*

### *Paddling paws*

The paws are attached to the paddle shaft with Velcro. Hands are protected from wind and cold. One size fits all, made of 4 mm - neoprene.

Art.No. 40 840

### *Neoprene socks*

No more cold feet when paddling with our neoprene socks. Neoprene keeps even wet feet pleasantly warm.

Gr. 36/37 - 46/47  
Art.No. 40 600

### *Gloves*

Gloves made of neoprene with non-slip texture on the inside as well as across the finger tips. Pre-bent fingers. Velcro strap at the wrist.

Gr. S - XXL  
Art.No. 40 830

### *Hoodie Wave*

The hood can be used independently of the jacket, it always fits your head, as there are different possibilities to adjust the hood to the shape of head. Closed at the neck: The hood offers protection from rain and seals off towards the jacket. The facial protection is folded back and attached with a Velcro fastener. Closed facial protection: The face is best protected from the elements.

Art.No. 46 980

### *Neo Shoe high*

High-cut paddling bootie made of elastic neoprene with vulcanized sole. Perfect in narrow boats, as the shoes do not take up a lot of space.

Gr. 35/36 - 45/46  
Art.No. 42 300

### *Neo Shoe low*

Low-cut paddling bootie made of elastic neoprene with vulcanized sole. Perfect in narrow boats, as the shoes do not take up a lot of space.

Gr. 35/36 - 45/46  
Art.No. 42 400

## Superlight Neoprene

Superlight – Neoprene is suitable for competitive sport, summer paddling and for wearing under non-breathable paddling jackets. Upper lamination 100% „Superstretch“ Nylon. The thermo-reflective lamination is pleasant on the skin, offers perfect ability to move and protects the body from cooling down.

### Pullover Superlight

Like Neoprene t-shirt, but with long sleeves.

Sizes: S - XXL  
Art.No. 41 550

### T-Shirt Superlight

Short-sleeved top.

Sizes: S - XXL  
Art.No. 41 350

### Shorty Superlight

Short Neoprene pant cut to fit when sitting.

Sizes: S - XXL  
Art.No. 41 450

### Cap Superlight

Very thin cap. Keeps warm and does not get in the way.

Art.No. 40 700

### Junior Neopreneshirt

Long-sleeved shirt made of thin Neoprene. Very stretchy and pleasant to wear.

Size 1, 2 and 3  
Art.No. 41 360

### Junior Jacket

Breathable jacket with comfortable fit. Adjustable collar and cuffs. Velcro fastener. Two-layered material.

Two-layered material:  
Upper material: 100 % Nylon  
Membrane: 100 % Polyurethane

Size 1, 2 and 3  
Art.No. 46 760

### Junior Long John

Neoprene suit laminated on both sides. The variable Velcro fastener at the shoulders and the flexible material make the suit grow with your child.

Size 1, 2 and 3  
Art.No. 43 200

### Junior Neopreneshort

Short Neoprene pants cut to fit when sitting. 3-mm-Neoprene, laminated on both sides.

Size 1, 2 and 3  
Art.No. 43 210

SIZE		1	2	3
With the help of our table, you can easily determine the right size for your child.	height	132 - 142 cm	142 - 152 cm	152 - 162 cm
	chest	66 - 71 cm	71 - 76 cm	76 - 81 cm
	waist	53 - 58 cm	58 - 63 cm	63 - 68 cm
	hip	71 - 76 cm	76 - 81 cm	81 - 86 cm

### Polartec Powerstretch

Perfect addition for breathable paddle clothing. Due to its paddler-specific cut is perfectly snug to the body when paddling. Polartec Power Stretch® is bi-elastic and especially breathable. The sturdy exterior is wind- and abrasion-resistant, the soft interior absorbs moisture from the skin and keeps the paddler pleasantly dry and warm.

#### Polartec Pullover

Sizes S - XXL: Art.-No. 49 300

#### Polartec Shorty

Sizes S - XXL: Art.-No. 49 400

### Bamboo Shirt

Made of odor-neutralizing breathable material which quickly diverts moisture from the skin. The natural infrared rays in the bamboo promote the body's own insulation. The incorporated UV ray protection 50+ protects the skin from the sun.

64% Recycle Polyester  
25% Viskose (Nano Bamboo Charcoal)  
11% Elasthan

Men, M-XXL: Art.No. 49 160

Women, M-XXL: Art.No. 49 170

### Barrels

Screw-top closures and rubber seal ensure these storage barrels are watertight, sturdy and food safe. The smallest barrel will fit behind your back belt.

3,6 Litres: Art.No. 90 305

6,4 Litres: Art.No. 90 310

15,4 Litres: Art.No. 90 320

26,0 Litres: Art.No. 90 330

### Handy bag

Floatable. Waterproof Nylon bag with valve for easy inflation, to ensure your mobile phone stays safe while paddling. Complete with safety loop and belt clip.

Available in 2 sizes:

Size M for mobiles up to approx. 7 x 13cm,

Size XL for mobiles and smart phones up to approx. 14 x 9 cm

M: Art.No. 44 030

XL: Art.No. 44 029

### Hatch bag

A combination of watertight clothes bag and hatch lid. Roll-top closure with triple safety buckles. Universal size for cockpits from 86cm. Straps, which are fastened around the boat, for strong hold. Handles facilitate handling of the boat with attached bag. Shoulder strap detachable. Material Nylon, taped seams.

Art.No. 78 010

### Air Pack

With the AirPack the paddler can always carry dry clothes without having to do without the safety of a floater. Watertight pack bag combined with separate floater.

Material: sturdy Nylon.

Size as floater 5.

See table page 42.

Art.No. 60 409

### Dry bags

Waterproof dry bag, made of sturdy Nylon material. With handle and removable shoulder strap. The roll-top closure is very soft and flexible.

20 Litres Art.No. 44 016  
40 Litres Art.No. 44 017  
60 Litres Art.No. 44 018  
80 Litres Art.No. 44 019  
100 Litres Art.No. 44 024

### Deck bag „Seayak“

Watertight deck bag, accessible from the boat. Bilge pump holder, mesh bag with zipper, signal whistle and straps for attaching to the boat.

Art.No. 44 025

### Watertight Deck bag

Deck bag, made of sturdy Nylon material with welded seams, can be mounted in front of or behind the cockpit rim. Roll-top closure with safety belt, handle and loops for attachment.

Art.No. 44 020

### Pack bag -flat-

Flat pack bags with roll-click closure. Wise addition to your boating gear. The flat cut enables storing the bag in narrow spaces. Due to this shape, the bag is also suited as a simple deck bag under the deck net of touring kayaks.

3 Litres: Art.No. 44 031

DIN A3 Art.No. 44 026

## Our Transport Range

Our product range offers you a great choice of aids to facilitate transport and handling of your kayak. Starting with the loading on the roof rack. You will need a basic rack that has been approved to meet your country's safety standards for your type of vehicle. You will get this base rack from your car specialist.

On the following pages, we are offering the kayak-specific equipment. Vertical support bars permit transport of several boats on the roof rack, as the boats are transported stacked on their side next to each other. The foldable version allows the rack to remain on the car in case of low overhead clearance, like a garage door. J-bars are the best protection for your boat in transport, as in this case the padding will cover more of the boat hull. The V-bars are especially suited for open canoes and large two-seaters. In order to easily load heavy boats onto the roof of the car, we are offering our heavy-duty load assist. With this aid, a single person can load even heavy boats without a lot of effort onto the car roof.

Depending on the distance of the roof rack tubes and the length of the kayak we recommend tying down the ends of the boat at the front and back, in addition to the roof rack straps. When transporting your boat on the roof, please observe the respective legal provisions regarding roof loads, permitted lengths and regulations about marking your load and vehicle with regard to overhang etc.

## Boat Carts

For transport from the car to the water and back as well as in case individual passages during river tours have to be mastered on foot, we are offering a large range of boat carts. Selecting the right cart depends on the boat type and the requirements regarding the pack size. Smaller, lighter carts can be stored well in the kayak, larger boat carts with large wheels roll better in difficult terrains and do not sink in so easily.

### Day Tourer **NEW**

The Day Tourer boat cart with strong elastic tie-down strap can be attached to the boat within seconds. Perfect for short transport from car to water or for short portages! Very small packing size.

#### **NEW Day Tourer L**

New, larger variety of the ingenious Day Tourer. The basic frame is a bit broader, so that it can glide a bit further towards the boat middle. We have also equipped the Day Tourer L with larger wheels, so that it rolls more easily. Handling remains simple.

#### *Day Tourer*

*Material: stainless steel*  
*Capacity: approx. 90kg*  
*Wheel size: 19.5 x 4.5 cm*  
*Weight: approx. 1.8 kg*  
*Art. No. 90191*

#### *Day Tourer L*

*Material: stainless steel*  
*Capacity: approx. 100kg*  
*Wheel size: 27 x 6 cm*  
*Weight: approx. 2.0 kg*  
*Art. No. 90187*

### Steel S & L **NEW**

The frames of the STEEL series are made of stainless steel and therefore absolutely corrosion-free. The new plug-in technology with springs made of stainless steel permits a construction without loose bits and pieces. PU foam wheels have a very light weight, the wheels cannot lose any air!

**Small pack size when dismantled!**

#### *Steel S*

*Material: stainless steel*  
*Capacity: approx. 90 kg*  
*Wheel size: 19.5 x 4.5 cm*  
*Weight: approx. 1.8 kg*  
*Art. No. 90192*

#### *Steel L*

*Material: stainless steel*  
*Capacity: approx. 100kg*  
*Wheel size: 27 x 6 cm*  
*Weight: approx. 2.5 kg*  
*Art. No. 90197*

### Crossover

Due to its round cushions suitable for all boat hulls from sea kayak to canoes. Can be fully dismantled, with broad wheels. Fits into narrow storage space. Cargo straps included.

*Material: Aluminium*  
*Weight: 3 kg*  
*Capacity: ca. 120 kg*  
*Art. No. 90 186, € 149,90*

### Crossover light

Very light, broad wheels keep the weight of the boat cart just below 2 kg. The wheels are foamed, so there is no tiresome pumping or loss of air.

*Material: Aluminium*  
*Weight: 2 kg*  
*Capacity: ca. 120 kg*  
*Art. No. 90 190, € 149,90*

### Boat cart with support

Free-standing cart with bulky tires, good ground clearance, cargo straps included.

*Material: stainless steel*  
*Weight: 2,6 kg*  
*Capacity: ca. 110 kg.*  
*Art. No. 90 193, € 149,90*

Our transport products and boat carts are exclusively produced in Germany.

### Foam padding

Prevents the kayak from slipping. 2 pieces.

Art.No. 90 236

### J-Bars

Made of galvanized steel with plastic sleeve. Set of 2.

Art.No. 90 210

### V-Bars

For transport of canoes or two-seater kayaks. Set of 4.

Art.No. 90 221

### J-Bars with paddle holder

You can now safely stow 2 paddles with each boat. The paddle holders are firmly connected with the J-bars. Paddles do not require extra strap. Set of 2.

Art.No. 90 215

### Vertical support bar with double eyelet

Ideal solution, if you want to transport several boats on your car roof. Belts can be strapped down on both sides. Set of 2.

Art.No. 90 219

## Stainless steel equipment

We are complementing our well-proven roof rack range with a stainless steel range. These new transport aids are meant to be mounted on roof rack tubes with grooves. Like for example Thule Alu, Zölzer or various profiles by car manufacturers. These parts can of course be also mounted on enclosed square tubes with the help of corresponding adapters.

### Stainless steel J-Bars

Very sturdy j-bar for the safe transport of your kayak.

Art.No. 90 216

### Stainless steel vertical support bar

Very stable vertical support bar. When not used, the support bars can be folded down, so the car will fit into your garage without having to dismantle the roof rack. Please measure the distances first!

Art.No. 90 235

### Adapter square 1

Suitable for adapting the stainless steel j-bars to standard square profiles.

Art.No. 90 230

### Adapter square 2

Suitable for adapting the stainless steel vertical support bars to standard square profiles.

Art.No. 90 231

### Tie down straps

Made of Polypropylene with self-clamping metal buckle.

3,5 m: Art.No. 90 240

5,0 m: Art.No. 90 250

### Python Masterlock

Made in USA. Very sturdy anti-theft device for kayaks, bikes and other sporting equipment. The steel cable can be tightened after locking.

Set of lock and steel cable 1.8 m

Art.No. 90171

Set of lock and steel cable 4.5 m

Art.No. 90172

Set of lock and steel cable 9.1m

Art. No. 90176

### Load assist

Loading your boat made easy with PRIJON's load assist! Fits every roof rack – easy handling even for smaller persons.

Who does not have this problem? The boat is heavy and the cars are getting higher and higher. Many paddlers are being put off the sport due to the sometimes very energy-consuming handling. The PRIJON load assist makes it possible for one person to load a kayak without any extra help. The load strap prevents the kayak from slipping backwards. The bow is placed on the extension, the stern lifted on the rack. Push the extension in, strap down the boat, done!

The most important advantages: You never have to carry the whole weight of the boat. There is no more difficult balancing to do. Even smaller persons can now easily load the boat onto the car roof.

Art.No. 90 225

### Adapter large

Adapter for attaching our roof rack equipment on oval or square profile tubes without groove. Maximum width 90mm and maximum height 45mm. Set of 2.

Art.No. 90 228

### Adapter small

Adapter for attaching our roof rack equipment on oval profile tubes with groove. Set of 2.

Art.No. 90 226

Kayak-Smurf  
Exclusively at Prijon!

Art.No. 99 995

### *Vaco seat cushion*

This new seat cushion for the PRIJON tour seat is a great help for paddlers who have problems sitting in the boat for a longer time. The cushion is filled with plastic beads and can be adjusted with a vacuum pump, the cushion then fits perfectly, because it takes the individual seat shape of the paddler. While en route, it can be changed or adjusted by pumping air in or out.

**Get in – pump- feel comfortable!**

Art.No. 90 169

### *Seat- and Backrest*

The included lumbar support can be adjusted via the backrest. Seat made of sturdy Nylon material with included foam padding, back rest cushioned with preformed foam wedge. Suitable for many different types of seat.

Art.No. 90 161

### *Comfort Backrest*

For PRIJON touring kayaks. The backrest is approx. 10 cm higher than standard backrests and very easy to install.

Art.No. 90 134

### *Seat cover Sirex*

Keeps you warm inside your kayak and at the camp fire.

Art.No. 90 160

### *Paddel cover*

To upgrade your Prijon touring seat.

Seat: Art.No. 900 013 15

Backrest: Art.No. 900 013 05

### *Seat cushion*

For better pressure distribution on the seat area on longer tours. Made of orthopaedic foam.

Art.No. 90 159

### *Seat cushion Junior*

Suitable for the SEAYAK Junior. Comes with attachment material.

Art.No. 90 184

### *Camp Fire Multi purpose seat*

Padded Kayak and camp fire seat, made of Nylon with adjustable back rest. Upper material 100 % Nylon

Art.No. 90 163

### *Canoe seat comfort*

Padded canoe seat for additional installation, incl. straps for attachment. Upper material 100 % Nylon

Art.No. 90 162

### Seat fit kit

Different pieces of foam to adjust the sitting position. Set.

Art.No. 90 015

### Repair sticks HTP

For repairs of minor damages on HTP hulls. Available in different colours.

Art.No. 90 080

### Reparaturset

**Kit Polyester:** Repair material for GFK kayaks. **Set Epoxy:** For repairs of minor damages on Carbon-Aramide kayaks and boats made of PriLite.

*Polyester: 400g, Art.No. 00 012*

*Epoxy: 250g, Art.No. 00 011*

### Abrasion protector

For the stern of Cruiser 430 in case of frequent ground contact, for example in kayak hire.

Art.No. 90 031

### XERAPOL POLIERPASTE

For surface care and removal of minor scratches on PriLite kayaks.

*50g, Art.No. 90 092*

### GLUE FOR PROTECTION CAPS

Also for stern mountings.

*70ml, Art.No. 90 096*

### MARINE GOOP

For gluing of foam separations and other sealing jobs on HTP kayaks.

*110ml, Art.No. 00 017*

## Mounting Kit for Torqeedo Ultralight 403

Motor mounting kit for Torqeedo Ultralight 403

We have integrated the smallest and lightest high tech electro motor by Torqeedo into our steering equipment, to fit PRIJON tourers. The motor is attached to the stern instead of the steering. The battery can be attached in the storage hatch or on deck. Steering is done via the foot pedals.

Performance details for a Prijon Touryak:

Half throttle: range approx. 26 km, run time approx. 4 hours, speed approx. 6.2 km/h

Full throttle: range approx 8 km, run time approx. 48 minutes, speed approx. 9.8 km/h

Weight approx. 7 kg, completely waterproof, precise GPS-based calculation of remaining range.

Included: Mounting kit for the motor with retraction device and steering lines.

Please refer to your kayak specialist regarding the price of the Ultralight 403 motor.

Art.No. 90 528

## Everything at a Glance

You can leave the back flap with our info centre folded out, while browsing through the catalogue. So you have all important information at a glance and can compare the boats easily. In the touring kayak section you will find a very wide range of boat types.

## Transport, Storage & Care

Prijon HTP – boat hulls are very sturdy and hard-wearing. The material used has already received its permanent protection against UV rays. Normal ground impact occurring when touring cannot harm the hull. Transport with standard roof racks is easy. Slight deformations caused by the cargo straps will go back to the normal shape within minutes after unloading the kayak. When transporting longer boats over longer distances, we recommend you additionally secure the ends of the boat with straps. If the boat is permanently stored outside, the boat hull should be covered, in order to prevent premature fading of the colour.

Temperatures of -40° C to +60° are no problem at all. Even under such extreme conditions, HTP will keep its flexibility and sturdiness. It is not necessary to treat it with varnishes, wax or other polishing substances. These would show on the surface and cause unattractive discolourations. For cleaning, use just warm water with a dash of washing-up liquid.
